

Simplicity. Efficiency. Productivity.

Harmony iQ® 1000 Series
OR Integration System

Supporting Your Needs for Basic Routing and Visualization in the OR

Introduce compact, easy-to-use image and video connection in your operating room with the **STERIS Harmony iQ 1000 Series OR Integration System**. The 1000 series is focused on the needs of the **low-complexity OR seeking greater productivity** by providing an **easy-to-implement, source-to-display solution**.

Pair with STERIS Vividimage® D Surgical Display and/or Vividimage® W Wall Display to create a comprehensive source-to-display solution.

A Safer OR Starts with No Clutter

The compact video distribution unit can be located out of view within the ceiling or wall for a streamlined integrated OR design. Cabling is kept off the floor, reducing clutter and trip hazards.

Connections that Provide Ready Access to Needed Information

A flexible design connects a wide range of imaging and video devices to standard or high-definition signals through input ports located at the wall, equipment management system (EMS) or **ConnectPoint® Video Connectivity System**. Critical information is easily viewed by OR staff to make informed treatment decisions.

Product Specifications

Harmony iQ 1000 Integration System	# of Sources	# of Display Destinations	Port Location	Control Type*
1100	5	1	Wall	At Monitor
1200	5	1	EMS	At Monitor
